DECLARATION UNDER 37 CFR 1.131(a)

Dear Sir:

We, Zhi Xian CHEN and Lian Hui ZHANG, applicants for the above-identified patent application, declare as follows:

1. I am an inventor of the invention disclosed and claimed in the above-identified application.
2. On a date prior to 18 December 1998 and subsequent to 1 January 1996, we conceived and reduced to practice the subject invention in Singapore, a WTO country.
3. Attached hereto as Exhibit A are photocopies of relevant pages from a laboratory notebook of Zhi Xian Chen. The photocopies are true and exact copies of the original notebook pages with the exception that all dates have been redacted so as to maintain the confidentiality of the actual date of invention. The entries in the original notebook pages were made, signed and dated by Zhi Xian Chen contemporaneously with the experimental work described therein. Each of the entries in the original notebook pages of Exhibit A was made prior to 18 December 1998.
4. The laboratory notebook pages show recorded work to complete the invention, including (a) obtaining cotton petiole explants, (b) exposing the petiole explants to a culture of *Agrobacterium tumefaciens* that harbors a vector comprising an exogenous gene and a selectable

marker, (c) culturing the petiole explants in medium containing one or more plant hormones to induce callus formation, (d) selecting a transformed callus that expresses the exogenous gene, (e) culturing the selected callus in suspension culture to induce formation of embryogenic callus, (f) culturing the embryogenic callus to produce embryoids, and (g) germinating an embryoid to obtain a transgenic cotton plant. The laboratory notebook pages further show germinating an embryoid to produce a young transgenic cotton plant and growing the young transgenic cotton plant.

5. In my opinion, all steps necessary to render the subject invention complete were made in Singapore prior to or by the date on which the last of the original laboratory notebook pages of Exhibit A were dated.

6. It is further declared that the accompanying Exhibit A may not be a complete record of Applicants' data concerning the invention of the instant patent application and are not necessarily meant to represent the earliest date of conception. The accompanying exhibits are presented solely to prove a completion of the invention prior to the earliest effective date (18 December 1998) of the Armstrong et al. (US 2004/0087030) prior art cited by the Examiner in the Office Action mailed 19 May 2006.

The declarants further state that the above statements were made with the knowledge that willful false statements and the like are punishable by fine and/or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that any such willful false statement may jeopardize the validity of this application or any patent resulting therefrom.
